Members		
Name:	Username:	Email:
Jiale (Jackie) Zhou	zhoujial1	Zhoujial1@myvuw.ac.nz
Patrick Mills	millspatr1	millspatr1@myvuw.ac.nz
Nicholas Winsley	winslenich	winslenich@myvuw.ac.nz
Kunal Sharma	sharmakuna	Sharmakuna@myvuw.ac.nz
Patrick Sawyers	sawyerpatr1	Sawyerpatr1@myvuw.ac.nz

Group Meetings:

Mon 11:10am

Thu 11 am

Create a summary of each meeting in a Word file. State what we worked on, what we struggled with and what we will do in the future.

Create a GitLab repository for the project.

Coding language we going to use: Java with UI libraries like JavaFX

GitLab Strategy:

Have a main branch and create branches to merge into the main branch. Create an issue and create a branch of that issue using a merger request (the same strategy as ENGR301.)

Plan:

Week 8: Initiation and start requirements.

Week 9: Finish requirements and start coding.

Week 10: Coding and review requirements.

Week 11: Finish group project.

Week 12: Write report.

Allocation of Tasks:

Notes:

Use StarUML.

High-level and low-level requirements.

Flight simulation and testing system. Same program but different parts.

Coverage testing and JUnit testing.

Ideas:

Could read planes from JSON files.

IDE Choice:

Ignore IDE files with .gitignore.
